High Resolution Area Monitoring of Customer Critical Emissions

Identify, monitor and manage emissions across the whole site

- Save time and money with next generation leak detection
- Increase the safety of your workforce by 360° 24/7 monitoring
- Extend your awareness beyond the fence line with multi compound multi zone visibility
- Meet your ESG objectives with intuitive dashboards

Because you can't manage what you can't see

Next generation leak detection

Scanfeld shows you where, what, how much, and since when gas is leaking in the event of an incident

360° 24/7 monitoring

With just a few sensor units you can provide effective large area coverage

Simple and intuitive operation

Full-service / low maintenance

Fence line and beyond

Multi-compound multi zone visibility of all the areas you and your stakeholders really care about

Completely independent of weather conditions

Scalable ESG and compliance monitoring

From corporate level reporting down to asset level detail from a single dashboard

Can measure multiple gases at the same time

No false alarms

The right solutions for your emissions managements needs

Our innovative solutions immediately detect gas leaks anywhere across industrial sites.

Energy

Detecting methane and fugitive emissions and increases the safety during oil and natural gas production.

Chemical industry

Improved safety for the production of ammonia, melamine, halocarbons, and other bulk chemicals. scanfeld helps preventing dangerous process gas emissions.

Petrochemicals and Refineries

Surveying industrial sites for dangerous emissions of hydrocarbons and VOCs.

Waste Water Treatment

Tracking and reducing emissions in water treatment plants.

Storage and handling areas

Loading area and tank farm safety.

Patented technology, made in Germany

Grandperspective GmbH was founded in 2018 by René Braun, Peter Maas and Alexander Herrmann. The founding team has over 25 years of experience in building and using remote sensing systems as well as extensive expertise in establishing and managing companies.

Grandperspective's mission is to make the management of hazardous gases safer – for industrial workers, the neighbourhood of chemical plants and the environment.
